

Platinum – where does it come from?

# Platinum is very rare!

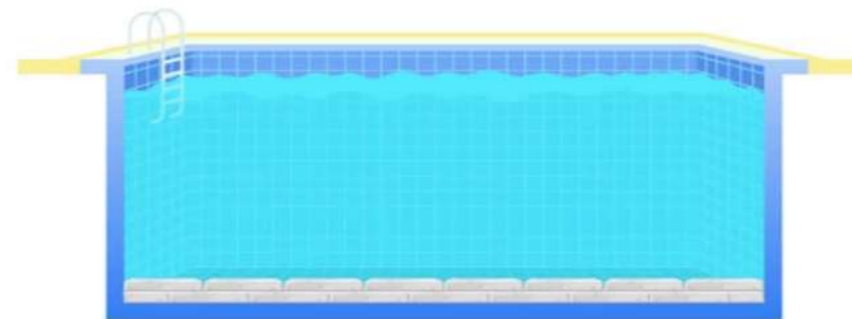

All the gold ever produced...

...would fill 3 Olympic sized swimming pools

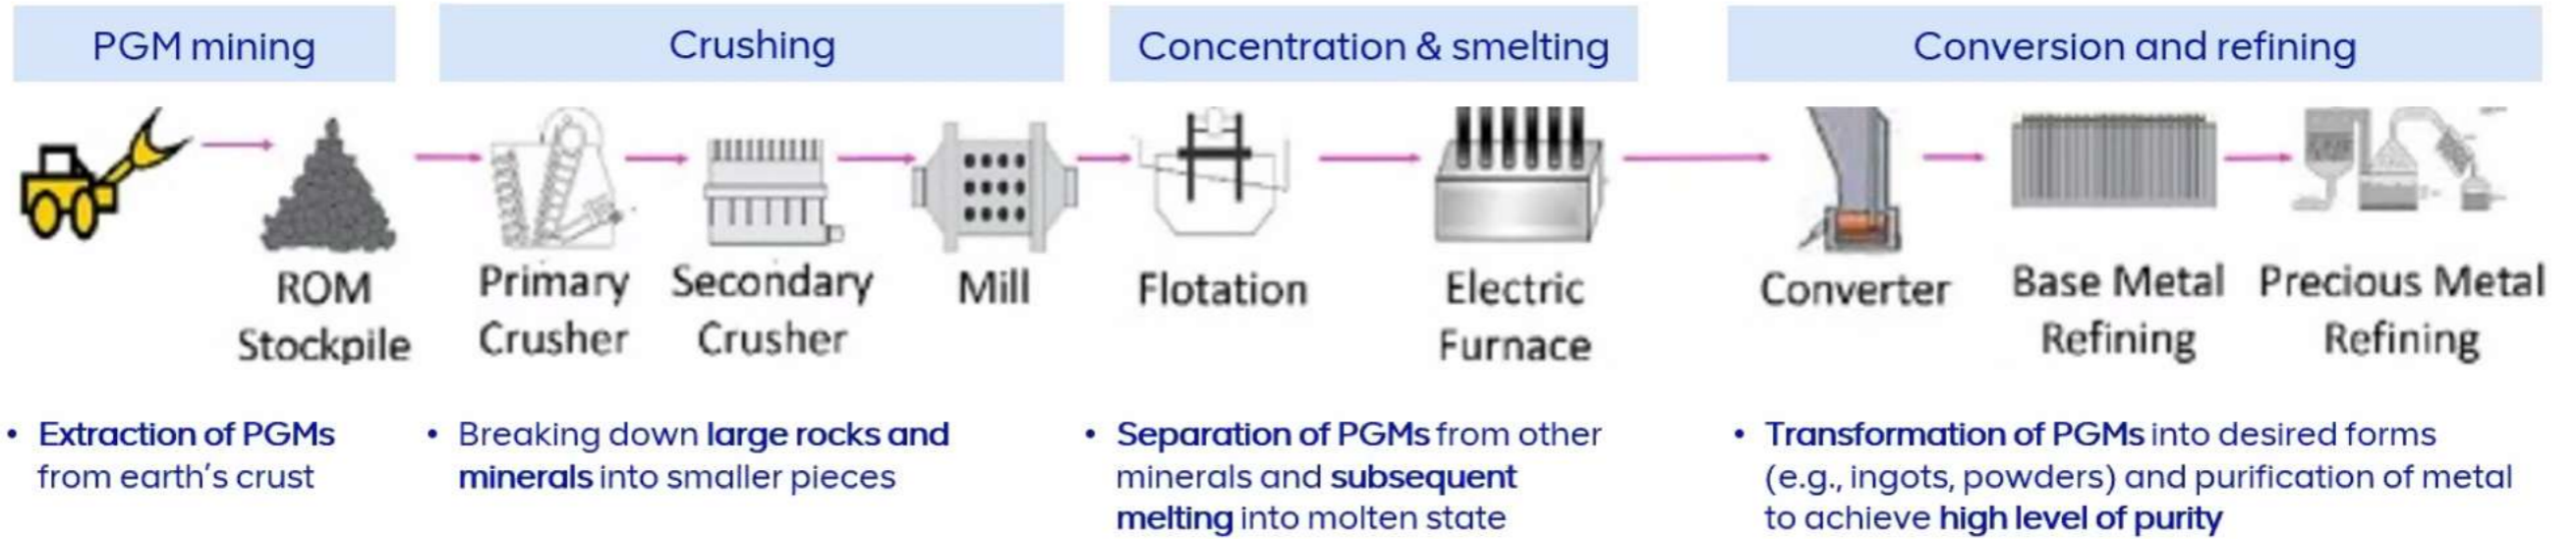

All the platinum ever produced...

...would only cover your ankles in 1 Olympic sized swimming pool

Source: WPIC

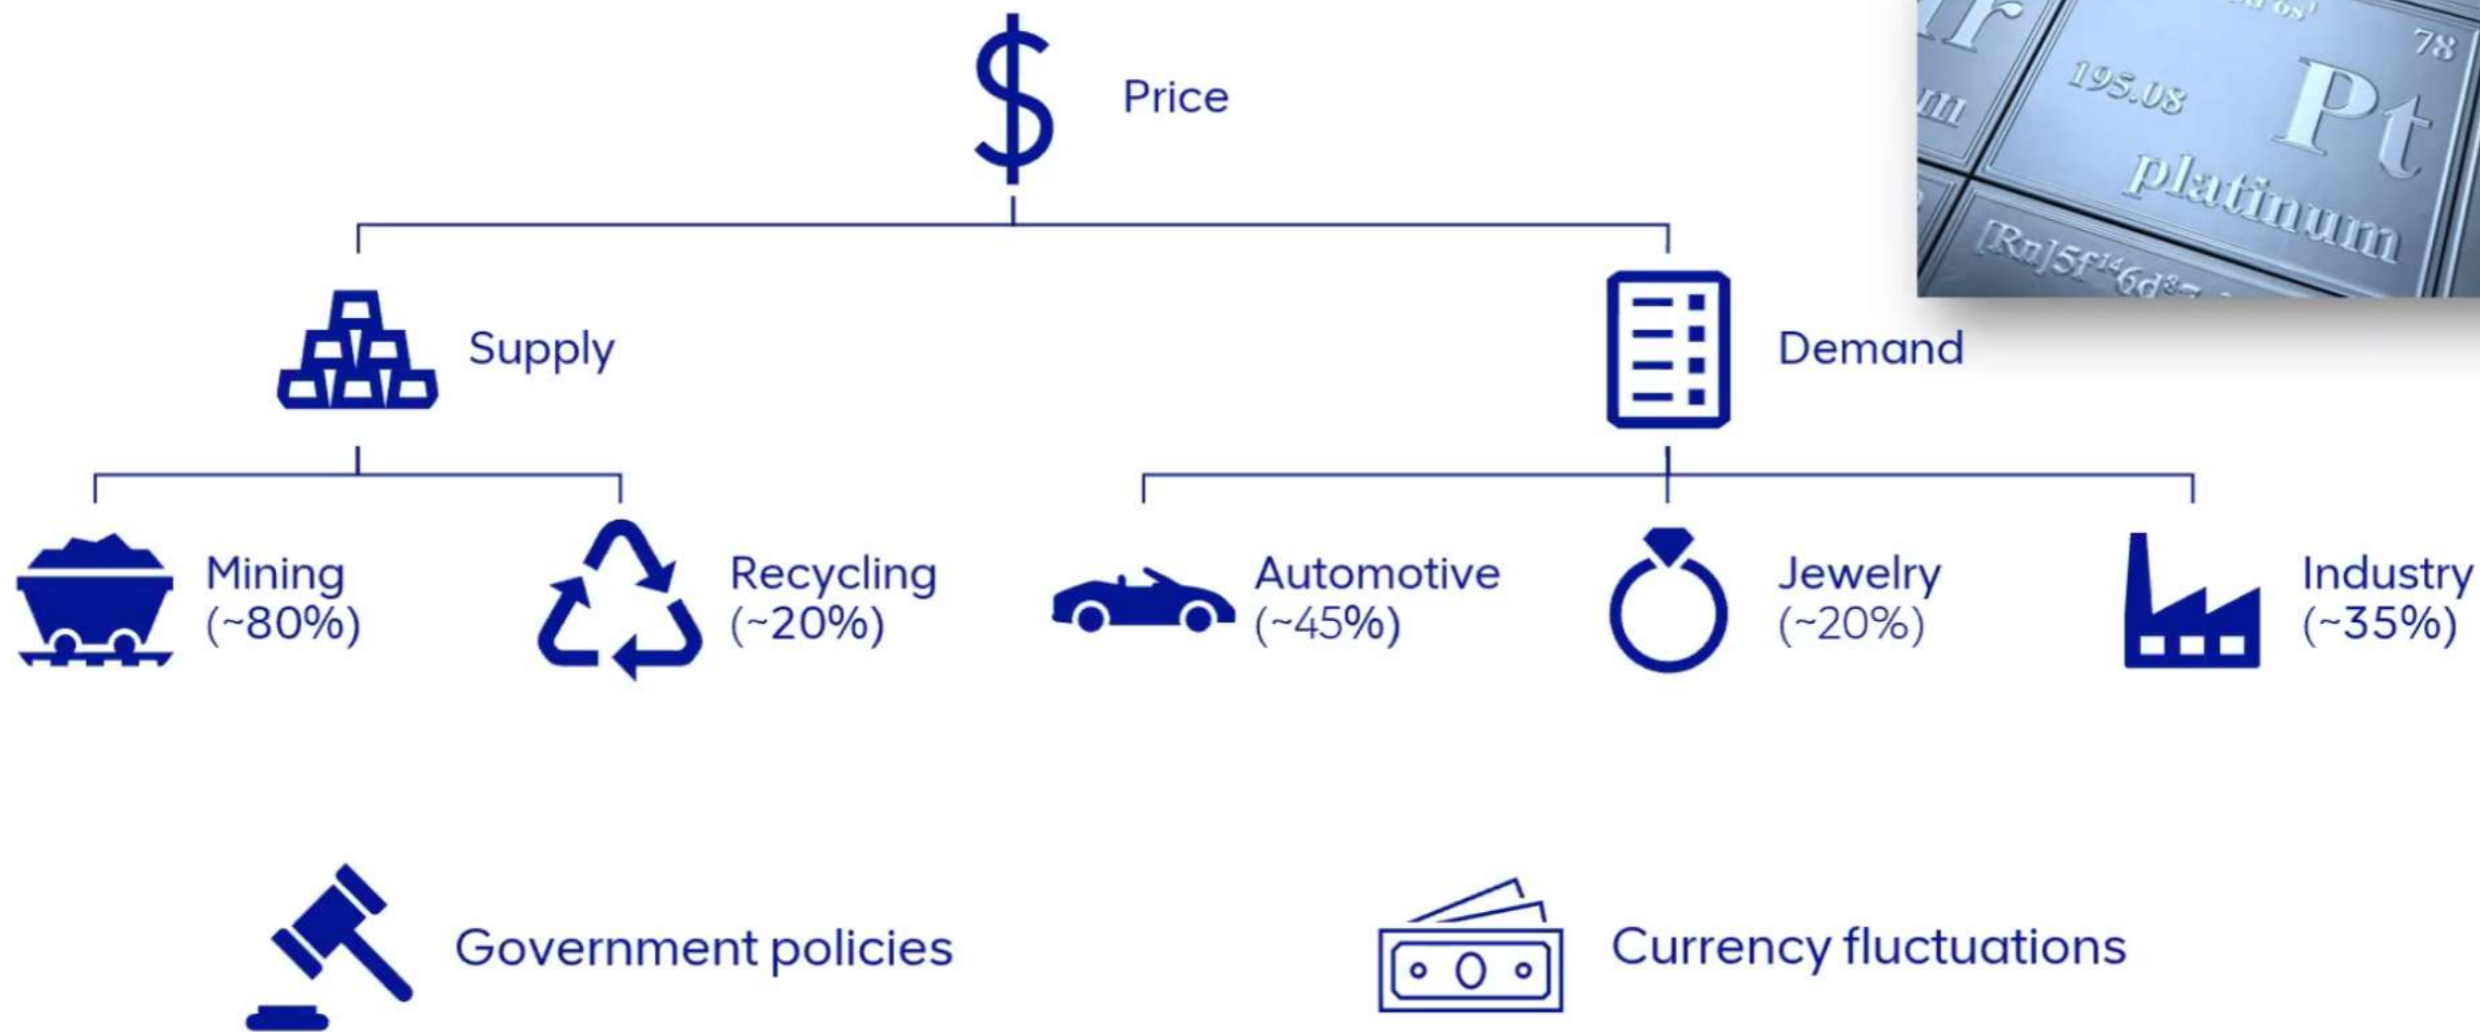

# One ton of PGM ore will provide 2-4 grams of PGMs

Can take up to six months to process 1 ton of ore to get 2-4 grams of PGM

# Factors driving platinum price

Source: PGI, JM PGMs report (2023)

# Decarbonisation of mining operations

We recently signed a landmark 20-year energy offtake agreement with Envusa Energy, a JV between EDF Renewables and Anglo American, to develop a regional renewable energy ecosystem in Southern Africa

**460 MW**

of renewable energy  
will be generated by  
solar and wind projects

**35%**

of Anglo American  
Platinum's energy needs will  
be supplied by renewables
