THE JEWELRY INNOVATIONS®

2025 SIGNATURE COLLECTIONS

Experience the warm glow of aged whiskey in a crystal tumbler, the crash of ocean waves against a rugged shoreline, or the echoes of a lost world ruled by dinosaurs. Our newest collections capture the romance and nostalgia of these classic timeless scenes.

In this catalog, you will see the Jurassic Collection™, featuring rings inlaid with genuine fossil dinosaur bone, the Shoreline Collection™ of rings embodying the joy of life along the water's edge, and the Cask & Cigar Collection™, a wearable tribute to fine whiskey and cigars. You'll also find the best-selling Barrel Aged® Collection of rings inlaid with genuine oak aging barrels, the Western Heritage Collection™ featuring the iconic designs and materials of the American West, and the National Pastime Collection™, showcasing designs and inlays from the golden years of baseball.

We specialize in men's rings made from contemporary fine jewelry metals, including Serinium®—The Precious Contemporary Metal®, Rugged Tungsten™, and Black Diamond Ceramic™. Many more collections are featured, including rings that are hand-carved and shaped, and hundreds of custom laser engravings. Only a small fraction of our thousands of styles are shown in these pages.

Please see our website, jewelryinnovations.com, or phone us and let us know what you need. We are proud to offer our industry leading quality and customer service to authorized jewelry retailers throughout North America.

Thank you for letting us serve you since 1989.

SERINIUM®

The Precious Contemporary Metal®

View the Serinium® collection on page 28.

RMSA002057
beveled | polish

Revolutionizing Contemporary Metal

In the late 1990s, we had an idea for something completely new to the jewelry industry. We wanted to develop what we called *the perfect contemporary jewelry metal*. Despite the popularity of metals such as tungsten carbide, titanium, and cobalt chromium, there were significant downsides to all of them and major safety concerns. Donny McIllece, our VP of Product Development, thought we could do better.

After years of development in numerous labs, in 2011 Jewelry Innovations filed its patent application for the fine jewelry metal that would come to be called Serinium®. Serinium combines the best properties of existing metals without any of the drawbacks. It is extremely hard and wear resistant like tungsten carbide, but not as brittle. It has a beautiful white color like cobalt and will not oxidize, tarnish, or change color over time.

Unlike cobalt and titanium, Serinium will not crush onto a finger and can quickly and safely be removed in an emergency. This hypoallergenic metal can also stand extremes of heat and impact without damage.

For all of these reasons, we call Serinium *The Precious Contemporary Metal™*. All of our collections, including those in this catalog such as Barrel Aged, National Pastime and Western Heritage, and all of our laser engravings, are available in this finest of all contemporary jewelry metals.

2016
PATENTED
No. 9,289,037

*...I was sad that my ring was broken, but really appreciate that it **saved my finger from being crushed** under a piece of lumber. The ring was broken but my finger was saved from harm. Thank you for getting my broken wedding ring replaced.*

> *The crew at JI delivered WELL ahead of expectations! We placed a couple orders with them the week before Christmas and weren't expecting them until the second week of January. Both came in already! Both got picked up by the customer already! And both customers were surprised! Thanks again! You guys rock!! Under promise, over deliver, and sleep easier at night!*

SERINIUM®

The Precious Contemporary Metal®

Patented for its unique beauty, hardness, and safety, Serinium® is truly the Precious Contemporary Metal®. Cast at high pressure and temperature, Serinium is bright white, ultra-hard, and hypoallergenic. Serinium will not crush onto a finger if compressed, and can easily be removed in an emergency with simple vice grip pliers or a ring cracker. It is the finest of all contemporary jewelry metals and is only available from Jewelry Innovations.

Offered in whole and half sizes 5–16*, from 6mm to 8mm widths.
**Some styles are available in size 4.5 (see page 52).*

We also have 4mm and 10mm width in certain styles.

Serinium® is a registered trademark for a branded fine jewelry metal.

“

Serinium...looks amazing and has a bright white color. It is ideal for both men and women and is one of the most amazing inventions in the jewelry world that has occurred in the last couple of years. ...No metal is perfect, but Serinium is close to perfection when it comes to wedding bands.

BLACK DIAMOND CERAMIC™

Black Diamond Ceramic™ is among the hardest materials in the world. Elegant and sophisticated, it is only half the weight of tungsten carbide and its black color is solid throughout, as opposed to a coating that can scratch and wear. Perfect for someone who wants the classic look of black in a contemporary ring.

Offered in whole and half sizes 5–16*, from 6mm to 8mm widths.
**Some styles are available in size 4.5 (see page 52).*

TrūBand Silicone™

Flexible, durable, and designed for an active lifestyle, TrūBand rings offer superior quality over standard silicone rings. Perfect for everyday wear or as a backup during strenuous activities, they protect both your wedding band from damage and your finger from injury—without compromising on comfort or style.

Offered in whole sizes 5–16, unless otherwise specified.

aerospace grade™ TITANIUM

Strong, flexible, and light weight, Titanium is the material of choice for many contemporary rings. But not all Titanium is created equal. Our Aerospace Grade Titanium is the highest quality Titanium available in the jewelry industry at 90% pure, the same quality standard required by the aerospace industry for the most demanding applications.

For the value conscious customer, many of our rings are also available in our Quality Standard Titanium™.

Aerospace Grade Titanium is offered in sizes 2–20, in 2mm–12mm widths. Quality Standard Titanium is offered in sizes 8–12 and widths shown.

KNOW YOUR CONTEMPORARY FINE JEWELRY METALS

A Brief Description of Metals and Their Properties

SERINIUM®

The Precious Contemporary Metal®

Serinium®, The Precious Contemporary Metal®, is a trademark for the newest and most beautiful of contemporary fine jewelry metals. This high-tech metal is patented by and exclusive to Jewelry Innovations®.

DURABILITY

- Many times harder than other jewelry metals, second only to tungsten carbide, which is far more brittle
- Will not chip or shatter if dropped on a hard surface, unlike tungsten carbide
- Ultra tough and scratch resistant

COLOR

- Beautiful bright white, similar to white gold and platinum
- Will not tarnish, oxidize, or change color

SAFETY

- Will not crush onto a finger during impact or injury
- Easily and safely removed in emergencies by applying pressure with vice grip pliers or a ring cracker
- Breaks cleanly in 2–3 pieces with no sharp edges
- Hypoallergenic

BLACK DIAMOND CERAMIC™

Black Diamond Ceramic™ is a brand of high-tech ceramic compound that is extremely hard and light weight, resulting in a beautiful and enduring ring.

DURABILITY

- Extremely hard and scratch resistant (rated 7 on Mohs hardness scale)
- Elegant lightweight feel, only half the weight of tungsten carbide

COLOR

- Can be made in many colors including black, white, and bright colors like pink
- All colors are solid throughout, eliminating the effects of wear even if scratched or worn

SAFETY

- Will not crush onto a finger during impact or injury
- Can be removed in emergencies by applying pressure with vice grip pliers or a ring cracker
- Hypoallergenic
- Non-conductive—a great option for electricians.

Did you know that the most popular fine jewelry metals for men's rings are not gold, silver, or platinum?
With so many options available today, here's a breakdown to help you understand which contemporary metal is best for you.

RUGGED Tungsten™

The original contemporary jewelry metal, tungsten carbide is the hardest of the contemporary metals, but it is brittle and can chip or crack if dropped on a hard surface. Rugged Tungsten™ is an exclusive, high-quality brand of tungsten carbide jewelry alloy uniquely formulated to resist breakage and oxidization.

DURABILITY

- The hardest of all contemporary metals (rated a 9 on Mohs hardness scale)
- Subject to chipping and breakage if dropped
- Heavy, luxurious weighted feel
- Can be carved and engraved with a laser, but too hard to cut with easily available tools

COLOR

- Attractive gun-metal grey, tends to oxidize and darken over time

SAFETY

- Will not crush onto a finger during impact or injury, but may shatter
- Too hard to cut, must be broken off with a ring cracker or vice grip pliers
- Can shatter into sharp pieces that may cause further injury

aerospace grade™ TITANIUM

Aerospace Grade Titanium™ and its value priced alternative, Quality Standard Titanium™ are branded alloys of titanium which is an extremely tough, flexible, light weight, and durable metal used in aerospace and industrial applications.

DURABILITY

- Not as hard as Serinium or tungsten carbide, but harder than gold
- Higher grades of titanium such as Aerospace Grade Titanium™ are harder to work with, but create stronger, harder, and more durable jewelry

COLOR

- Light grey

SAFETY

- Will crush onto a finger during impact or injury
- Difficult to remove in an emergency
- Must be cut in at least two places with diamond edged tools, generating significant levels of heat in order to be removed
- May cause further injury during emergency removal
- Hypoallergenic

RING STYLES & SIZING

FLAT | DOMED | BEVELED | FLAT GROOVED EDGE | DOMED GROOVED EDGE | ROUNDED EDGE | SQUARE

All rings are available in whole and half sizes **5–16***.

The following rings are also available in size **4.5*

SERINIUM®

8mm . . . . . Flat

BLACK DIAMOND CERAMIC™

6mm & 8mm . . . . Flat
6mm & 8mm . . . . Domed
6mm & 8mm . . . . Beveled
8mm . . . . . Flat Grooved Edge
6mm . . . . . Domed Grooved Edge

How to size your customer's finger:

Please use **narrow ring sizers** (approx. 2mm) when measuring, as all Jewelry Innovations rings feature a Comfort Fit interior—even in 8mm and 10mm widths.

If you prefer measuring a customer's existing ring, please size the ring on the mandrel with the **center** of the ring to get a more accurate fit.

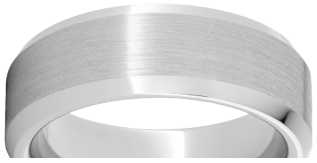

Still not certain? Give us a call and let us help you get the perfect fit.

RING FINISHES

Most finishes are available on any style ring. Pictured are examples of finishes on Serinium® bands with the associated style numbers. Some finishes can be combined for a unique look.

WE STAND BEHIND OUR JEWELRY

Our industry leading warranty and customer service are our commitment to you.

- Free service, refinishing, and repair of rings, including size exchanges, for one year from date of store sale.

  Does not include repair of rings with Hidden Gold, diamonds, or other precious stones, which may be subject to additional charges. Copy of invoice required.

- Free lifetime replacement of any contemporary metal ring removed in a medical emergency.

- Free lifetime ring replacement for breakage of Serinium®, Black Diamond Ceramic™, and Rugged Tungsten™.

  Fees may apply for inlays of gold, sterling silver, platinum, Shakudo, or Mokume.

- All services including repair and replacement of inlays, refinishing, and size exchanges for a fee after one year from date of store sale. Serinium® for $35, Black Diamond Ceramic™ and Rugged Tungsten™ for $25.

  Inlays of sterling silver and platinum for $50. Inlays of gold, Shakudo or Mokume for $100 and must be returned with the ring.

- All services of Hidden Gold rings for a fee of $100.

Alteration or damage due to abuse, including damage from engraving, soldering, sizing, polishing, ultrasonic cleaning, chemical exposure, or other obvious abuse will void any warranty or service policy. Please also note that these policies do not apply to custom goods, including engraved or personalized items, which will be subject to additional fees.

Email us your order and we'll respond right away.

Just as the name implies, Jewelry Innovations is constantly bringing out new styles, staying ahead of the wedding band trends. The quality is consistent and sizing is spot on. All of these are well and good but would mean little without customer service. Many companies want to be "your partner", while this is true of Jewelry Innovations, they also become your friend. You will bring them in your store for the margin, and you'll keep them for the customer service.

Bill Archinal | Barnes Jewelry

We love working with Jewelry Innovations! They have good product, get it to us fast, and right the first time. I really feel like they have our back.

Michael F. | Occasions Fine Jewelers

Vendor shout out to Jewelry Innovations. They have the best staff, the most patience, (customer decides to lose 26 pounds and 2 weeks before wedding needs his 14.5 exchanged for a 13.5), and best exchange policy, (one year, unlimited, size exchange FREE with a $35, shipping included, changes after one year.) Thank you!

Becky Beck Ryan | Becky Beck Jewelery Store

Highly recommend. I have been a customer for over 9 years.

Josh Chapman | Chapman Jewelry and Repair

Jewelry Innovations supports independent jewelry retailers and industry organizations. We never sell directly to the public, and are proud members of:
